THE MOPAR ® OFF-ROAD DIVISION CONTINUES TO DEDICATE ITS FULL ATTENTION TO DEVELOPING THIS LINE OF SERIOUS COMPONENTS THAT OFFER UNIQUE STYLE AND EXCEPTIONAL FORTITUDE TO TRAVEL TO PLACES THAT TRAIL-RIDING ENTHUSIASTS CONTINUE TO DREAM OF REACHING.

ENHANCE YOUR DREAM MACHINE WITH CUSTOM JEEP ® PERFORMANCE PARTS

A. 2-INCH LIFT KIT WITH FOX® SHOCKS .(1) Kit is completely engineered by, tested, and approved by the Mopar ® Off-Road team to be the best solution for your Wrangler. Includes 2.5-inch-diameter aluminum body monotube FOX® Shocks for cooler operation, increased articulation and tire-to-ground contact. The longer front control arms optimize caster for improved handling. The included heavy-duty front and rear brake rotors are engineered for high heat capacity. The parts are easy to install as no driveshaft or brake line replacements are required. Kit comes in a reusable Jeep ® Brand wooden crate.

B. BIG BRAKE KIT. Upgrade your braking system to complement larger wheels and tires. Kit includes heavy-duty brakes, front and rear calipers, rotors, pads and front hoses, and is the same as the Rubicon ® production brake kit.

C. FRONT RUBICON CRATE AXLE.

D. REAR RUBICON CRATE AXLE.

PERFORMANCE 44 AXLES. (Not shown). Made in the USA and built strong for hardcore Jeep ® Wrangler off-roaders. High-strength features include AdvanTEK ® Gear technology that reduces gear set packaging with more strength and durability, allowing for a condensed carrier and improved ground clearance. Chromoly 4340 axle shafts, thicker quarter-inch steel bracket mounts, thicker 9.5-mm tubes and upgraded 1410 U-Joints also increase trail durability. A nodular iron differential cover provides extra ribbing for strength and increases overall rigidity. The high-clearance carrier design adds an additional half-inch of ground clearance, and an expanded range of gear ratios (4.56, 4.88, 5.13 and 5.38) helps accommodate for a variety of tire sizes. The direct bolt-in axle assembly allows use of OEM components and provides a “plug and play” experience. Includes electronic differential lockers already installed.

NEXT-LEVEL CAPABILITY

(1) It works with Electronic Stability Control, although unique alignment specifications are required.

A. TUBE DOORS (1) Enjoy the breeze and sun while adding the feeling of security. Mopar® Tube Doors are constructed of 2-inch round steel tubes. Sold as a two door kit and four door kit.

B. WRANGLER SNORKEL. Directs cool air into the engine when driving through conditions that threaten normal air inlets. The snorkel is designed to fit air boxes on 2.0L and 3.6L gasoline engines.

C, D. COLD AIR INTAKE SYSTEM. Features Jeep®PerformanceParts logo and reusable Black and Silver drop-in filter. Draws fresh air from outside vehicle into hood cut-out to increase engine performance. Includes bezel to finish cut-out. Bezel shown in D.

MOULDED ROCK RAILS. Constructed of heavy-gauge steel to help absorb impact and protect lower bodyside panels while off-roading.

E. RUBICON® ROCK RAILS. Made of Black, powder-coated steel and are the same as production Rubicon® Rock Rails.

F. JEEP® PERFORMANCE PARTS ROCK RAILS. Designed to meet the demands of the off-roader and provide added vehicle body protection. They are fabricated using zinc-coated steel for superior corrosion resistance and roll-formed. The outer surface is e-coated and then DuraBull®-coated (truck bedliner coating), providing superior protection and durability.

Not all part numbers shown. See retailer for additional part numbers by vehicle application.

(1) Do not drive your vehicle on public roads with the doors removed as you will lose the protection they can provide. This procedure is furnished for use during off-road operation only. All occupants must wear seat belts during off-road operation with doors removed.
**MAP OUT YOUR STRATEGY**

**MODIFY FROM THE ROAD UP**

A. CENTRE HIGH-MOUNT STOP LIGHT (CHMSL) RELOCATION KIT. Allows you to add a 35-inch or larger tire on the spare tire mount and move the CHMSL to the center of the spare tire. Can be used with the Oversized Spare Tire Carrier and/or Tailgate Reinforcement System. Guided by Factory System | **MOD-32**

B. OVERSIZED SPARE TIRE MODIFICATION KIT. Mounts to the swing gate and is adjustable to hold non-production tires and wheels up to 37 inches. Carrier is painted a corrosion-resistant Black finish. Requires Tailgate Reinforcement System, sold separately. Guided by Factory System | **MOD-32**

C. TAILGATE REINFORCEMENT SYSTEM. Allows for larger tires to be mounted on the swing gate. Reinforcement is powder-coated Black and works with production hinge for easier installation. Must be used with the Oversized Spare Tire Modification Kit, sold separately. Guided by Factory System | **MOD-32**

**LARGER TIRES**

Whether you’re in the mud or on the rocks, beefy off-road tires are designed to give you a better off-road experience.

**LARGER WHEELS**

Just like thick tires better connect to the terrain, off-road wheels help improve handling, acceleration, braking, traction and steer. Wider wheels can accommodate larger tires and offset for clearance to the body/frame.

**HIGHER FENDER FLARES**

Higher fender flares keep larger tires from coming in contact with the factory fender flares during articulation.

**2-INCH LIFT KIT**

A 2½” lift kit is good enough to help your Jeep® better navigate on-road obstacles without major modifications. Available for Two Door or Four Door vehicles. Made in the U.S.A. Guided by Factory System | **MOD-2S**

**WARNING:**

Adding bigger tires and wheels to your Wrangler can require additional modifications. Be sure you understand how equipment upgrades will affect other components and carefully plan out your build.

**ADDITIONAL ACCESORY REQUIREMENTS:**

- Tailgate Reinforcement System
- Oversized Spare Tire Carrier
- CHMSL Kit (optional for 35-inch tire on spare)

**ACCESSORY REQUIREMENTS:**

- Tailgate Reinforcement System
- Oversized Spare Tire Carrier
- CHMSL Kit (optional for 35-inch tire on spare)

**ADDITIONAL ACCESSORY REQUIREMENTS:**

- Tailgate Reinforcement System
- Oversized Spare Tire Carrier
- CHMSL Kit (optional for 35-inch tire on spare)
When heading off-road, it may be prudent to increase the utility and strength of your Wrangler, especially the Front and Rear bumpers. You’ll add vital protection, improve approach and departure angles, as well as increase your ability to manoeuvre through tight spaces. Be sure you understand how equipment upgrades will affect other components and carefully plan out your build.
